- Salesforce certified AI Associate (Credential ID: 4823882)
- Certified for training completion in **TrackWise Digital Platform Management, TWD Quality Management and TWD Complaints Management** from Sparta systems | Honeywell
- Certified in **ACE Core®** training completion of Adoptive Compliance Engine (ACE) from PSC software®

Work Experience (5 years 4 Months)

HCL Technologies, Chennai (4 years 4 Months)

Designation: Senior Software Engineer | October 2025 – Present

Software Engineer | April 2022 – September 2025

Client: Otsuka America Pharmaceutical Ltd

Domain: Life Science and Healthcare

Product: **Trackwise Digital** – R&D Quality Management System Application

Role and responsibilities

- Analyzed functional and technical client requirements and customized Salesforce solutions in TWD using declarative development tools. Administered and maintained Trackwise Digital platform, ensuring system configuration align with business and compliance requirements
- Managed user access, roles, permission and security settings to maintain data integrity and compliance
- Collaborated with cross functional teams (Global Quality, regulatory) to gather requirement for the configuration
- Customized salesforce **data model** by configuring **Custom Objects, Fields & Relationships, Page Layouts, Lightning Record Pages and Validation Rules** to align with requirements
- Implemented robust **security model** using **Profile, Permission sets, Role Hierarchy, OWD and Sharing Rules** to enforce data access policies and ensure system security
- Configured and Managed TWD platform configuration like **Setup, TWD workflows, Record Details Component, Audit Trail, Record Access Rules, Meaningful Data Change, 123 Task Automation** and other Utilities
- Developed and maintained **custom dashboards and reports** to provide actionable insights to stakeholders
- Worked in large data set import and export using **Data Loader, Workbench** tools on **Dictionary maintenance** to ensure data integrity
- Configured and maintained **Single Sign-On (SSO)** in salesforce using SAML 2.0, enabling seamless authentication through Azure AD identity provider
- Performed **managed package version upgrades** by reviewing release notes, testing sandbox environments and coordinating safe production updates
- Prepared **Post-release documents** like configuration specification, Functional Requirement Specifications, User Requirement specifications to enforce traceability and Audit compliance. Prepared Knowledge Transfer

- Documents, user guides and Tip Documents to handover repeated incidents to L1 team
- Troubleshoot system issues, coordinated with **vendor support** and documented resolutions
- Participated in system audits and ensured adherence to internal SOPs and external regulatory requirement
- Provided trainings and support to end users, ensuring adoption and efficient use of TWD functionalities
- Worked in alignment with **ITSM** process (Incident, Change, Problem and Service Request Management) to ensure seamless and complaint Trackwise Digital administration and development
- Implemented Translations to **Japanese** and **Korean** languages in TWD
- **Skilled** to perform salesforce deployments using **Change set** and VS Code, ensuring smooth migration of metadata across sandboxes and production. Skilled to create and maintain deployment checklists, rollback plans and post deployment validation steps for error free delivery
- **Skilled** to implement scalable **Apex triggers** and classes using **Apex Trigger Handler Class Design Pattern** to automate complex business logic with governor limits to ensure best practices, asynchronous process with **Batch Apex**, **Future method**, **Queueable Apex** and **scheduled Apex** to improve performance, **Lightning Web Components** (LWC) to build interactive and reusable UI components
- **Skilled to leverage Data 360 (Data Cloud) and Agentforce** to build unified, data-driven AI solutions; adept at orchestrating real-time data ingestion, harmonization, and identity resolution to power autonomous agents, implementing custom Apex actions, prompts, and topics that ensure secure, context-aware, and highly scalable customer interactions.
